Scholarship grants to collaborate with Arquivo.pt

Bursaries Investiga XXI – Arquivo.pt

Arquivo.pt is an innovative research infrastructure that enables search and access to web pages preserved since 1996. It is an international reference with a significant scientific production.

The main objectives of the Investiga XXI bursaries are to:

- provide training in innovative information technologies that enables more efficient and effective research over data published in the Digital Era;
- establish relations between Arquivo.pt and researchers to potentiate the production of post-bursary scientific results;
- encourage researchers from various scientific fields to meet and take advantage of Arquivo.pt as the main or complementary source of temporal information;
- promote research over XXI century data.
